## START ERECTION OF SUBSISTENCE HOMES, SEPT. 1

### Outline Plans for First Time on Building of Farm Dwellings

Construction on the houses and out-buildings on the 50 federal farm subsistence homesteads in Lake county will be started on September 1, according to George F. Gonsalves, manager of the project, who returned this week from Washington where he conferred for ten days with the officials of the federal land conservation and resettlement departments.

Mr. Gonsalves was also able to outline for the first time some of the plans for the structures which are to house the homesteaders in the experiment that is the first of its kind to be attempted in the nation.

**Fix Average Cost.**  
The cost of the homesteads equipped with buildings will average about \$4,000 to the homesteaders although this price will vary as to the size of the structures. The homes will have 4, 5, 6 or 7 rooms depending on the size of the family of the homesteader.

Each of the homes will be equipped with electric lights and an electric water pump to draw water from a driven well. The homesteader will be forced to resort to the old wash tub for his ablutions unless he can arrange for the installation of bathroom fixtures. The water pipe and drains for the bathroom fixtures will be installed by the government however.

The long debated issue as to whether, or not, the homes should be equipped with a basement has been settled, the authorities at Washington deciding that they should be equipped with these facilities.

**Start Surveys.**  
The work of surveying the properties for the location of the well and the buildings was started this week. The drilling of wells will be started within a week or two.

Day labor will be used in the construction of the buildings under the personal direction of Mr. Gonsalves who is a successful building contractor.

Indications are that the dwellings will be completed in time for occupancy sometime during the next winter and before time to begin the spring planting.

**Will Erect All Homes.**  
Although but 25 of the applicants have been granted homesteads all of the buildings will be erected on the 50 acre tracts. The remaining homesteads will be allotted to applicants after the erection of the buildings.

Practically all of the homesteaders have been working small gardens on their tracts during the present summer and all of them intend to plant trees and shrubs on the acreages as soon as they are advised as to the location and shape of the buildings to be erected on the lands.

### Governor Okeys

#### Delinquent List Publication Law

Governor Horner has signed House Bill 127 affecting newspapers. Under the terms of the measure, delinquent tax lists for a township or road district must be published in the newspaper in that particular township or road district if one exists. In case there is no newspaper published in the township or road district from which the delinquency list originates, it shall be published in some newspaper to be selected by the county treasurer in the same county as the township or road district.

Under the old law, delinquent tax list publications were permitted in any newspaper in the county. The new law, which will become effective April 1, will keep the publication of tax lists in the "home newspaper" rather than in the county seat or largest newspaper in the county as has been the custom in most places. It will divide advertising of this type among all newspapers in each county rather than allowing all the business to be sent to one publication.

### Warriner's Subdivision to Stage Field Day

Residents of Warriner's subdivision at Lake Catherine will celebrate and entertain guests at a Field Day Saturday. The group has arranged several outdoor games which will feature a baseball game, the winners receiving a silver loving cup donated by Dr. W. W. Warriner. Swimming, racing and boating stunts are also on the schedule. Mrs. Ted Holland and Mrs. Arthur Fitzgerald have charge of the refreshment arrangements.

See where gunmen entered a nudist camp in Barcelona, Spain, and looted the inmates of \$7,000! And we're led to believe they had nothing on them!

## 64 Miles of Paper Goes Through News' Presses in July

More than 64 miles of paper was used in producing the Antioch News and other publications during the month of July. The printed pages passing through the News' presses during the month if laid end to end would extend from Antioch beyond Rockford, or from the News' plant beyond Milwaukee or South Chicago.

The month's job in publication work involved the printing of nearly 200,000 printed newspaper pages and required about two tons of paper.

The preparation of type for the presses required the correct handling of approximately a million type characters.

## ILLINOIS HAS 9,594 MILES OF IMP. ROADS

The State of Illinois has a total of 9,584 miles of surfaced roads in its state highway system, of which 9,572 miles are high-type surface roads, according to official figures just made public. Charles M. Hayes, president of the Chicago Motor Club, announced today.

Mr. Hayes said that Illinois surfaced and improved 781 miles of roadway during 1935, the latest year for which data have been prepared. He continued:

"There are a total of 271,845 miles of surfaced roadway in the state highway systems of the entire United States. Of this, 113,850 miles represent high-type surface and 157,995 miles low-type surface."

"A total of 27,939 miles were surfaced and improved throughout the nation during the year. Missouri led all states with regard to mileage surfaced and improved, with a total of 3,305 miles, followed by Texas with 2,905 miles. At the close of the year there were still 73,906 miles of non-surfaced highways in the state systems, as compared with 32,150 miles in 1932."

"The hundreds of millions of dollars that will be available for road construction during the next two years, as a result of both the works relief grants and the Federal aid program, will mean further additions to the improved highway mileage in the United States. Too, these funds will provide for better engineering of present roads, so that existing routes will be made safer than ever before."

## ORDER 58 TAVERNS TO PAY-UP COUNTY LICENSE OR QUIT!

### Supervisors Set August 1 as Deadline for Payments in Full

Fifty-eight taverns in Lake county will be padlocked unless their county license fees are paid in full August 11. This is the final word of the license committee of the Lake county board of supervisors which has continued its inspection of the taverns since the first of May, when the county license fee of \$150 was due.

Of the many taverns in the county, 121 have their license certificate and most of the 58 taverns, all of which received the stamp of approval with reference to health and sanitation conditions, have paid sums up to \$125 on their applications. The county license is issued only upon full payment of the fee.

Some of the tavern operators have been making payments on the installment plan, according to records on applications in the county clerk's office. Only one of such operators who has made partial payments has been reported to have closed his place of business and moved out. The remaining 57 are still operating, but must pay up in full by the first of next month or fold up, the license committee declares.

The members of the license committee are: Supervisors: Homer T. Cook, Leonard D. Hook, Walter Diermer and Frank Davis.

## Change for Cent May Be Coined By U. S. Mints

Half-cent and one mill coins may be turned out of the U. S. Government mints for circulation in Illinois and 22 other states and New York City in which sales taxes are in effect.

This was announced this week by Secretary of the Treasury Morgenthau following opinions as to the legality of the state's aluminum fraction of a cent tokens contemplated for sales tax collections in Illinois and other states. He will ask Congress to authorize the Treasury Department to issue the smaller coins at the present season.

It is pointed out that most of the states have at least a two percent sales levy, which means that a person who makes a 25 cent purchase should be taxed one-half cent. Because there are no one-half cent coins at present, in most instances a full cent has been collected from the person.

The profit to the government will be in what is called seigniorage. This is a charge or toll deducted from bullion brought to the mint to be coined or the difference between the cost of the mass of bullion and the value as money of the pieces coined from it.

Last year coinage of one-cent pieces alone netted the treasury a profit of \$339,000. On one-half cent and mill (one-tenth of one cent) pieces there would be less return, but the mint can turn out even these coins at a profit.

## STATE MAY OPEN RT. 173 TUESDAY

### Installation of Grade Crossing Signal Needed Before Opening

Route 173 through Antioch will be opened for traffic early next week, according to Michael Mohlen, head of the Mohlen Construction company of Algonquin, contractor for the job.

Opening of the gap east of the intersection at Rt. 54 (Milwaukee ave.) is dependent on the installation of grade crossing signals by the Soo Line, he explained.

The other section of pavement between Rts. 54 and 59 will probably be opened for public travel Tuesday. Work of building the shoulders will be done while traffic uses the new road, Mohlen explained.

State Engineer James N. True of Mundelein, who was assigned to the road-building by the state heads, is now dividing his time between checking the work on Rt. 173 and surveying the section of Grand avenue between Lake Villa and Wedge's Corners at the Rt. 45 intersection. The state intends to rebuild that section of the road, removing several dangerous curves and hills on the section.

Local softballers went to work on aspiring aggregations in the locality this week to keep honors in the famous Hickory, Channel Lake A. C. pushing the Hickory All-Stars into the discard, the 16 to 3, and the Antioch All-Stars trouncing the Wilmet laddies, 10 to 5.

The Lakers climbed all over the offerings of Stahmer in the Hickory session on the Grade school diamond Monday night, holding the horsehide for 22 hits. O'Haver took over the mound business for CLAC, and while Hickory touched him for 14 hits, he limited the run production to a lowly tryout.

**Bats Blast Away**  
Heavy blasts from the bats of Elmer Smith and Masters, plus Ray Sorenson's circuit clout, with the bags jammed, was more than enough to furnish O'Haver with a comfortable lead.

The All-Stars slashed away at Wilmet's lead under the Spring Grove electric lights Monday night to win their game against the offerings of Beaster, who was plastered for 11 safe clouts. Wilmet apiked the plate for 4 of their runs off Bill Keulman in the first four innings, after which the Antioch pitcher tucked away the final run-producing ball until the final frame when the last score was hung out, while his mates hammered the ball.

**Sterbenz New Manager**  
Victory over the fast stepping Wilmet fire laddies marked the end of Bill Murphy's managerial duties for the All-Stars. He turned over the job to Joe Sterbenz following the evening's play with a season's record of 11 wins against 7 losses. Tonight (Thursday) the Antioch lads entertained Hickory at the Grade school.

CLAC has a return game with Wilmet at Spring Grove next week when they will put their regulars on the field to avenge an earlier defeat with a make-shift lineup, suffered at the hands of the fire laddies, 8 to 4. Several of the club's heavy-hitters were absent from the contest and they are anxious to take Beaster's offerings on an inspection tour of the premises. The Wilmet pitcher bung up 12 strikeouts in the previous meeting.

**Box scores:**  
CLAC 090 351 60-16 22 2  
Hickory 000 210 000-3 14 0  
Batteries: O'Haver and Nolan, Mil-  
ler; Stahmer and Hanks.  
All Stars 104 230 -10 11 4  
Wilmet 121 000 1-5 8 9  
Batteries: Keulman and J. Murphy;  
Beaster and Callow.

**Ancient Motor Vehicle Brings Fame to Antiochan**  
Mrs. Marion Rigby, president of the Antioch public library board, saw herself driving her antiquated touring car in the pages of the Chicago Sunday Tribune. It is reproduced on another page of this edition together with the Chicago newspaper's story.

## NON-HIGH SCHOOL AREA RESIDENTS VOTE AUGUST 3

### Board Seeks Levy Increase to Pay Tuition of Rural Students

Education for Lake county boys and girls who live in non-high school districts will be decided at a special election Saturday, August 3, when voters will have the opportunity to approve an increase in the tax levy for tuition.

The special vote on the proposition follows the legislation introduced by Rep. Thomas A. Bolger of McHenry, in the general assembly, which became effective on June 1. Under provision of this bill, the non-high school district board may increase the tax levy to three-fourths of 1 per cent upon the property valuation. In the past the levy was limited to not more than one-half of one per cent.

Approval by the voters is necessary before the increase in the levy can be made.

**Face Involuntary Truancy.**  
It is pointed out that eighth grade pupils ready to enter high school this fall face involuntary truancy unless funds are raised with which to pay the tuition. The greater part of the 345 pupils who completed their primary education in the rural schools of Lake county in June reside in non-high school districts. In order to enroll at one of the county's recognized high schools, arrangements for tuition of those pupils must first be made.

Seven voting precincts are listed for the special election. The polling place for voters in Antioch and Lake Villa township not in a district maintaining a recognized four-year high school, such as the Antioch Township high school, will be held at the school house in Lake Villa, District 41. Polls will be opened from 12 noon until 7:00 o'clock, daylight saving time.

**List Board Members.**  
The Lake county non-high school district board of education consists of: Mrs. Bernice M. Bacon of Round Lake, president; William M. Bonner of Wadsworth; and Robert Gullis of North Chicago. W. C. Petty of Antioch, county superintendent of schools, is secretary.

**Daniel O'Brien Dies of Illness At Channel Lake**  
Daniel F. O'Brien, for many years a summer resident of the Lakes region, died at his home in Woodcrest subdivision at Channel Lake Monday morning at 6 o'clock following a lingering illness of several months.

Last rites were held this morning (Thursday) from the Maternity E. V. M. church in Chicago with interment in Mount Carmel cemetery.

Mr. O'Brien is survived by his wife, Catherine; his mother, Mary; a son, Roger; and daughter, Mrs. Margaret Strattan. He likewise has four brothers: William, Dennis, John and Charles. He was connected with City of Chicago municipal government affairs before his illness forced him into retirement.

**Schmeling May Seek Lakes Region as Site For Fight Training**  
Max Schmeling, former heavy weight prize-fighting champion of the world, may train for his comeback campaign at the Round Lake arena if a Chicago battle can be arranged for him before the winter months. This was reported by Peg Behning who helped bring Kingdahl Levineky to train in these parts for the Joe Louis match August 7. The reputation of the Lakes region for conditioning such internationally known boxers as Gene Tunney and Barney Ross has started the German challenger inquiring about the region.

**Insurance Companies Distribute \$1,524,000 to Lake County People**  
Life insurance policyholders and beneficiaries in Lake county received \$1,524,000 in life insurance payments in 1934, statistics just released by the National Underwriter reveal. Total payments in the state amounted to \$213,000,000 or a per capita distribution of \$27.05. In the United States and Canada \$3,101,535,930 were paid out.

Some of the Libertyville young men seem to be getting on to themselves in the so-called "donkey baseball" played there.

### Loans Made Under National Housing Act

## Yesterdays

News of Bygone Years in Western Lake County

## Forty Years Ago

Mrs. J. C. James, Sr., is entertaining her brother from Kenosha.

Mr. and Mrs. John Grimm and daughter, Mrs. Barnard Yopp, Joseph Yopp and W. S. Westlake and J. J. Burke visited the county seat last Thursday.

Mrs. R. Johnson visited relatives on English Prairie Sunday last.

C. E. Herman, Fred Schott, George Wallis, Ben Stone, A. E. Case, F. F. Fenderson and others from Antioch were in Chicago this week.

Master Thomas Burke, son of the Sr. of the News, entertained his young friends yesterday, from 4 to 7:30 p. m., it being the occasion of his fifth birthday.

John Heran of English Prairie was a caller at the News office yesterday.

## Thirty Years Ago

Lee Middendorf of Grayslake spent Sunday at his home south of town.

Will Hannoman and George Goltz were transacting business in Chicago Tuesday.

Frank Haycock of Chicago spent over Sunday with relatives here.

Moffenry is rejoicing over the fact that the prospects are bright for an electric road to connect that village with Chicago.

The following from Antioch are in attendance at the races at Davenport, Iowa, this week where "Little Wonder," owned by Charles Sibley will trot on Wednesday. Charles Sibley, Henry Herman and J. J. Morley.

## Fifteen Years Ago

Miss Anna Baber is spending this week in Chicago.

Mr. and Mrs. Jos. Osmond and Mr. and Mrs. Alfred Madison of Sharon, Wis., were Sunday guests of the Osmond family here.

E. E. Hawkins returned home from his trip to New York, Wednesday afternoon.

The Ladies' Guild of St. Ignace church will hold their fifth annual bazaar in the opera house Wednesday, August 11, all day. In the evening there will be an entertainment followed by a dance.

## Ten Years Ago

Mrs. Charles Alvers and son, Charles, Jr., went to McHenry Monday to spend some time with her sister, Mrs. F. P. Howe.

Mrs. Lawrence Hoffman and cousin of Chicago were seeing the sights of Yellowstone Park this week.

Mrs. Clair Kelly of Chicago has been visiting relatives here the past week.

Mr. and Mrs. Fred Kinrade entertained Roy Snyder of Oshkosh this week.

Mrs. Nora Cairns and daughters, Jennie, Helen and Mattie, and Fred Beers of Woodstock were guests at the Harry Osmond home Sunday.

## TREVOR

Mrs. Harold Sullivan and children of Chicago and mother, Mrs. Joseph Holly, of Oak Park, visited at the Donald McKay home Sunday. The former's daughter, Elaine Sullivan, returned home with them after spending her vacation at the McKay home.

Mrs. George Faulkner and Mrs. David Kimball, Wilmet, visited Mrs. Luanah Patrick Wednesday afternoon.

Miss Gertrude Nett, Wilmet, spent Tuesday night with Marguerite Evans. On Wednesday they called on Bernice Longman.

Mrs. Harold Nickle spent Wednesday with her sister, Mrs. Hans Dietrich, Twin Lakes.

Mrs. Susan Carroll and nephews, Mrs. Ed Yopp, daughter, Rose, and son spent Wednesday at Twin Lakes.

Miss Bernice Longman, Cross Lake, spent Wednesday with the home folks celebrating her birthday anniversary.

Willis Sheen made a business trip to Racine Saturday.

The Patrick sisters entertained in honor of their brother, Hiram's birthday anniversary Sunday.

Mr. and Mrs. Charles Murphy and children, Kenosha, called at Mrs. Murphy's brother's Pete Schumacher, Sunday.

Mr. and Mrs. Ed Mutz and niece from Keokuk, Iowa, spent Sunday at Lake Geneva.

## MILLBURN

Mr. and Mrs. Stone and sons, Niel and Allan and Eugene Elliott of Fredericksburg, Iowa, spent several days with the Herrick family. Their daughter, Irma, returned to Iowa with them on Sunday after a month's visit at the Herricks.

Burial services were held at Millburn cemetery at one o'clock on Saturday for Louis Larsen, former resident of Millburn vicinity who passed away at his home near Burlington, Wis., on Thursday.

Twelve members of Hickory Unit of Home Bureau studied "First Aid in the Home" with the local leaders, Mrs. Robert Bonner and Mrs. Emmett King, when they met at the home of Mrs. Lena Winters at Rosecrans Thursday afternoon, July 18th. Miss Eloy Dixon gave the third lesson on Books which included Literature for Children, and "How to Review a Book." Four visitors, Mrs. Warren Edwards, Mrs. Mattie Edwards, Mrs. Frank Leable and Mrs. Oscar Finkel were present. The next meeting will be at the home of Mrs. W. A. Bonner in September.

Geraldine Bonner from Champaign spent the week-end with her parents.

The Happy Rainbow Workers' Club with their assistant leader, Miss Lila Behrens, attended the county contest for girls' 4-H clubs at Grayslake Friday, and took part in the dress review.

Marian Edwards of Oak Park is spending two weeks' vacation at the home of her parents, Mr. and Mrs. F. G. Edwards.

Mrs. Mattie Edwards and grandson, Edward Dickey, returned to their home in River Forest after ten days at D. B. Webb's.

Mrs. E. A. Martin and son, Richard, attended the DeMolay mothers' picnic at Ross Park Tuesday.

Miss Doris Jamison returned home Tuesday after spending several weeks with friends at Spooner Lake, Wis.

Gilbert Neilson, Racine, is spending his vacation at the Alfred Dahl home.

Mr. and Mrs. Ed Gorum, Mrs. James Lamb and daughter, Betty Jane, Kenosha, were Saturday evening callers at the Joseph Smith home.

Mr. and Mrs. Chris Schafer and son spent Sunday with Mrs. Schafer's parents, Mr. and Mrs. Freeman Higgins, Pleasant Prairie.

Miss Marguerite Evans spent Sunday with her cousin, Mrs. Fred Hawkins at Chain o' Lakes golf grounds.

Miss Bernice Longman, Cross Lake, spent Sunday with the home folks.

The members of the Trevor Leaders 4-H club enjoyed Camping Day Monday at Puddocks Lake.

Mrs. Gus Lubkoman, Bristol, and daughter, Mrs. Howard Grau, Evanston, called on Mrs. Charles Oetting Saturday evening. Sunday callers were Mr. and Mrs. Herman Oetting, Berwyn, Ill.; Fritz Oetting, Cicero, Ill.; Herman Bushing and Ted DeLong, Chicago.

The Indian "Cornplanter" "Cornplanter" (1782-1830) was a celebrated half-breed chief of the Seneca Indians, the son of a trader named John O'Ball. During the French and Indian war he led a war party of the Seneca which had joined the French against the English, and took part in the defeat of Braddock in 1755. During the Revolutionary war he joined the English, took an active part in the border conflicts in New York, and seems to have been present at the massacre of Wyoming. Afterward he became a steadfast friend of the whites and with fled Jacket, directed the affairs of his tribe for many years.

Origin of Diesel Engine  
The Diesel engine was patented by Doctor Diesel in 1892. The first real engine was built the following year. It was first exhibited in 1898.

Just a Petty Rebellion  
"Putsch" is a German word from the Swiss dialect and means a popular uprising or a petty rebellion.

Before  
you order fuel  
learn about low-cost

**GAS**  
**HEAT**

Investigate our Special Summer offer—install gas heat now and pay nothing until October

EVENTUALLY you'll have modern, automatic gas heat. When your neighbors tell you of the joy and comfort that gas heat brings into their homes you'll want it, too. Then why not have it now? There's no need of putting off the day when you'll have this twentieth-century convenience. Before you order fuel, get the full facts on gas heat.

Now at low rates, every home—even the most modest—can afford gas heat. Rates for gas

are now one-half of what they were in the 1930-31 heating season. And our special offer lets you try before you buy. We'll install it at our expense and you pay only \$3 a month rental during the first year for the equipment in the average home. This charge will be included in the bill for the gas you use. Use it for one month, two months or a year.

There are many reasons why you want gas heat. It ends days

and nights of coal shoveling... of hauling ashes... chopping kindling... the anxiety of watching fires, setting dampers. Walls and drapes stay clean, free from dust, grime and soot. There is no more tracked-up dirt from the basement.

Don't delay—investigate TODAY

With gas heat a single match is your kindling pile for the year. You fire your furnace from your easy chair.

Now in effect  
**LOW COST**  
for Heating Homes  
with  
**GAS**

You Invest Nothing!

Without ONE CENT of investment by you, we install the most modern burner in your furnace or boiler. If you are satisfied, it stays. If not—and you are the sole judge—out it comes and your former heating system is re-installed—AT OUR EXPENSE. We make this offer because of our confidence in the perfection of gas heat.

## ANTIOCH and Vicinity

Miss Evelyn Hennings  
Is a Summer Bride

In a ceremony performed at Woodstock Thursday afternoon Miss Evelyn Hennings, daughter of Mr. and Mrs. C. E. Hennings of Antioch, became the bride of Edward Frazier, son of Mrs. Charles Mockenborg of Chicago. The marriage was performed in the presence of a few immediate relatives. At present they are living in Antioch. Later they will make their home in Chicago where Mr. Frazier is employed.

DIDAMAS HOLD  
FAMILY REUNION

A family reunion picnic for the Didama family was held at Kenosha Park Wednesday. The following families were present: Mrs. John Hancock and daughter, Mrs. George Nutt, of Antioch; Mrs. Tracey Davis and daughter-in-law, Mrs. Donald Davis and baby son of Crystal Lake; Mrs. William Toehert and two sons, Mrs. Hugh Hoffendick and baby daughter, Mrs. Lester Nelson and family and Mrs. Nels Nelson and daughter, Mrs. Vera Rentner of Antioch.

MRS. QUEDENFELD IS  
HOSTESS TO CLUB

Mrs. Lois Larson won high score at the Wednesday 500 club entertained this week at the home of Mrs. Henry Quedenfeld on Lake street. Mrs. Belle Fox won second prize.

ALTAR AND ROSARY CARD  
PARTY A SUCCESS

The first of a series of card parties to be held by the members of the Altar and Rosary Society of St. Peter's church, was held at the home of Mrs. Lester Osmond, Friday afternoon with good attendance. This party was sponsored by group No. 1 with Mrs. John Doyle in charge. The next party will be held at the Jynch home on Petite Lake, Friday, July 26. Everyone welcome.

**WOMAN'S CLUB TO SPONSOR  
CARD PARTY MON. AFTERNOON**  
The Antioch Woman's Club are sponsoring a public card party to be held at the home of Mrs. H. H. Grimm Monday afternoon, July 29th, at 2 o'clock. Bridge and 500 will be played. Lunch will be served. Prizes will be given and also a door prize to the lucky number. Tickets 50c.

SWIMMING PARTY  
AT CHANNEL LAKE  
ATTRACTS CROWDS

About fifty members and friends of the Young People's Christian League of Waukegan attended a beach party at Channel Lake last week. Diversions of the evening were swimming, boating, dancing and a wicker roast. Frank Thomas was chairman of the committee in charge and was assisted by six league members.

ST. PETER'S CARD PARTY  
AT BEATTY'S HOME A SUCCESS

With two hundred and sixty-eight persons playing bridge, 500, luauo and pinochle, the St. Peter's card party given at the home of Mrs. Edw. Beatty, at Lake Marie Saturday afternoon, was the largest attendance of any party given this season by the organization. Besides prizes for each table, there were eight major prizes.

MRS. ROOF ENTERTAINED  
BRIDGE CLUB TUESDAY

Mrs. Margaret Roof entertained the members of her bridge club Tuesday afternoon at the home of Mrs. Eugene Hawkins on Main street. High score was won by Mrs. James Stearns.

## The Last Duel

No definite information is available on the date and place of the last duel in this country. A bill prohibiting dueling in the District of Columbia was passed in 1839 and since the Civil war stringent laws have been passed in all the states against dueling. The practice became obsolete in this country decades ago, but it was a gradual disappearance and no doubt many duels were fought secretly even after the passage of some of the state laws.

**California Lands Many Fish**  
California annually reaps a harvest of around 600,000 pounds of fish from the Pacific ocean.

## CHRISTIAN SCIENCE CHURCHES

"Life" was the subject of the Lesson-Sermon in all Churches of Christ, Scientist, on Sunday, July 21.

The Golden Text was, "How excellent is thy lovingkindness, O God! therefore the children of men put their trust under the shadow of thy wings . . . and thou shalt make them drink of the river of thy pleasures. For with thee is the fountain of life" (Psalms 36:7-9).

Among the citations which comprised the Lesson-Sermon was the following from the Bible: "In the way of righteousness is life; and in the pathway thereof there is no death" (Proverbs 12:28).

The Lesson-Sermon also included the following passages from the Christian Science textbook, "Science and Health with Key to the Scriptures," by Mary Baker Eddy: "Mortals claim that death is inevitable; but man's eternal Principle is ever-present life" (p. 312).

**CHRISTIAN SCIENCE SOCIETY**  
955 Victoria Street  
Antioch, Ill.

Sunday School . . . 9:30 A. M.

**"DIFFERENCE"**By EDYTHE S. DRAPER  
© D. J. Walsh—WNU Service.

GAY. How gay. The woman stepped her slow pacing of the pebbly seashore. Her eyes had been on the ocean. Now they were on the gay house, small, quite alone by the sea in the yellow sand.

Blue-gray stones piled in two pyramids in the two green rectangles of lawn were entwined by a thousand oranges and yellow and flame-bright nasturtiums. Oceanuma, deep-crimson, scarlet, salmon and rose-pink, stood straight and stiff and splendid in pots along the stone embrasures of the porch.

The house was painted an incredible exquisite pink. Shells, pink and white, set off against the other, outlined the gravel path from the pink gate in the pink fence to the pink house. And the ocean was blue the woman knew though she did not turn her eyes from the house. And the sky was blue. Gay, gay, sky and sea and flower and house. The woman felt a little gay lightness in her. She felt able to venture.

"I will have this house," the woman murmured. "I will go in now and take it. The doctors, they are wrong. Six months? No. Forever, in this house."

She opened the gate. It was low. She could almost have stepped over it. It was a toy fence, a toy house, toy flowers, all for a good child. She was it, that good child. She would, with much, much money, make the people know that.

"I will have this house," she said again firmly.

Who could be living here? Far from boarding-house and hotel and palace-cottage?

In such rash gaiety! Did they not know that the gods are jealous of the very happy? People very young and brave, believe, these were loving color and breeze, and each other.

She had used to come to this place of sand. Yes, away up here. With Angus.

When in years now had she thought of Angus! Angus the sailor! He was dead perhaps in some far city, low in some still green sea. But, no. Two stubborn Angus to die. Old stubborn Angus, old Scotch, stubborn Angus. "You can't ference! Can't you say difference?" "Yes!" he had roared. "I don't see any difference between difference and difference!" "Very well, then, Mr. Angus! Good-by."

She had laughed and gone. She knocked.

Anybody in the house wanting to analyze the sound of those white knuckles on the tiny door would have said it was the knocking of some woman getting in always where she wanted to get in, having always what she wanted when she got in, but yet not often glad.

Perhaps one in this house was discussing with himself this knock, coming perhaps to some conclusion about it. For the door remained closed. The woman stood before it and a flush came up into her cheeks, making them young. She knocked again hard. The door remained closed. A third time she knocked and tears were in her eyes as she turned away.

Then the door opened. A man robust and vital and compelling stood smiling at the woman. He wore a velvet coat. He had a white beard. A pink rose half-blown was in his buttonhole. He had a cork leg. He was no one she had ever seen, the woman said to herself. His eyes were very blue, his cheeks pink. Gay and content seemed he.

"Good morning! Come in! He stood aside a little and the woman entered the pink toy house.

Sunshine filled the house coming in through many windows.

The sunshine had a gay rainbow sheen because it came in by so many green leaves and flowers to the house. It glinted on a clear large round bowl of goldfish. It sparkled up the feathers of greenish birds flitting among orange trees and ferns and oleanders.

The inside walls of the house, the walls where no windows could be were like a museum. Plaques were on them from China, kakemono from Japan, fat gods from India and a lovely Taj Mahal; ivory and ruby-inlaid carvings from Turkey, monkeys and parrots, stuffed, ungilded, richly earth-colored pottery from Central America, milk fans from Malaysia. On small mirrors many tables bits of porcelain and coral and intricate inlaid fragrant boxes holding treasure. The woman's eyes sparkled, her cheeks were deeply flushed. She felt young, not ill.

"I will take your house," she said breathlessly.

The man's eyes sparkled, too. The lips under his very white beard twitched.

"The little house? But, please, it is the lunch hour. If you will sit for a moment."

"Oh—I do not eat."

"But I do! I am agreeable after lunch. I may give my house away, after lunch."

He opened a door and went out.

She sank down against golden embroidered cushions in a long low chair of bamboo.

The ferns waved their lacy fronds in the wind from the sea.

The oranges and oleanders breathed forth fragrance. The goldfish swam delicately appreciative of their own scintillant beauty to the reflecting translucent depths of their coral-caverned sea.

The birds preening their emerald and yellow feathers on perches among the

ferns in the sun twittered out little upward-sliding chirpings.

The woman's eyes were taken from this to that.

They had no chance to turn inward, to peer into her own sore soul.

A splendid house the woman had in the far city, a darkly splendid house with many grand rooms. In that house one's thoughts were pressed into one's self.

"Oh, you'll take the high road, and I'll take the low road."

The man's barytone came into the room where the woman sat.

She held her head quickly up for an instant and smiled.

Then she lay back long and slender and pale, resting from deep weariness against the golden embroidered cushions.

Her hands lay open and empty on the chair arms.

She smiled, but two tears ran down and met the points of the smile.

"Old stubborn Angus sang that," she whispered.

Then not caring to be thinking she turned to watch the birds.

In this house one would be always interested. And when she wanted open space, sky, sea, blue-lavender distances—there they were beyond the open windows merely for the lifting up of one's eyelids.

Space outside seemed more beautiful for the things inside and the things inside were comforting when space without was too empty and wideness appalling.

An old, old Chinaman wrinkled like a long-folded saffron silk handkerchief brought lunch in on a small ebony table. Inlaid, with golden dragons, too forgettable in yellow cups of egg-shell thinness, jelly with the shavings of innumerable Nipponese habes, orange marmalade, hot crisp biscuits, but, first, clam-chowder.

The tasting nerves are the organ of memory.

At the first whiff from under the silver dish-cover the woman's eyes widened and darkened. At the first taste accustomedness and happiness sat in the room of her mind, strange guests therein.

"Old stubborn Angus," she whispered low into her tureen. "You would have clam-chowder."

"Did you speak?"

"No. Oh, no."

And she ate her first food in four days, like a hungry child.

After a while the Chinaman came and took the table away.

The woman still in the low golden chair lifted beseeching eyes.

"You, you might rent the house?"

"This the self-assured, commanding woman whom the great of the earth stumbled over each other to kneel to! This the woman whose name and face the people of three continents knew and worshipped?"

The man stood with his white beard covering his lips, twitching. His eyes sought the sea, dreaming in the afternoon sun. The blue of his eyes became bluer than the blue of sea and sky together.

"I'll not rent it. No."

"Oh."

"It is yours."

"Mine?"

"The years, Nora, have made in me no difference."

"Oh! Old stubborn Angus!"

"To you, the years, have they made any difference?"

"They have. They have." As if repeating a litany she reverently intoned, "There is no difference between difference and difference."

"You will have the house, Nora?"

"With you?"

"With me or without me."

"With you, please, Angus."

Ramie, Substitute for Cotton, Linen, in West

Success in growing ramie or China grass as a partial substitute for cotton and linen and a probable aid to both in making better twines or fabrics is announced by Bela Chatt, who has been growing this plant experimentally near Los Angeles, says the Chicago Tribune. Mr. Chatt reports a probable yield of more than 1,500 pounds of ramie fiber an acre.

Ramie fiber has been produced in China thousands of years, but only by laborious hand processes not possible without very cheap labor.

Although ramie fibers are stronger than cotton or linen and have the other advantage of glistening almost like silk, they have two serious practical disadvantages. One is that they grow embedded in a layer of extremely sticky gum, every trace of which must be removed from each fiber before these can be used. The other is that individual fibers, even if from the same plant, may differ considerably in length, so that it is difficult to sort and spin them by machinery.

With the cheap Chinese labor, the fibers merely are picked out and degummed one by one and are sorted into lengths by hand. Many degumming machines have been suggested, but most of them require the crude stalks and carried to some kind of factory, during which trip the gum dries out and becomes still harder to remove.

Some Equivalents

One tablespoon of butter makes one ounce. One tablespoon of granulated sugar makes one ounce. One heaping tablespoon of powdered sugar makes one ounce. One tablespoon of flour makes half an ounce. Two tablespoons of ground spice make one ounce. Five nutmeg equal one ounce. One pint of granulated sugar makes one pound. One pint of chopped meat, packed, makes two pounds. One cup of rice makes half a pound. One cup of stemmed raisins or cleaned currants make six ounces.

6

## For Dinner... \$1.50 to Spend!

Do you remember when you were called upon to do mental arithmetic in school, and had to do the sums rapidly in your head? That's something like being confronted with the necessity of producing a good dinner for six people when you are down to your last dollar and a half.

Or perhaps, because the problem is so confusing it's more like the experience of Lewis Carroll's Alice with the Red and White Queens when she found her way through the Looking Glass.

"Can you do Addition?" the White Queen asked. "What's one and one and one and one and one and one and one and one and one and one?"

"I don't know," said Alice. "I lost count."

"Can't you do Addition?" the Red Queen interrupted. "Can you do Subtraction? Take nine from eight."

"Nine from eight I can't, you know," Alice replied very readily.

"She can't do Subtraction," said the White Queen. "Can you do Division? Divide a loaf by a knife—what's the answer to that?"

A Dietitian Knew the Answer.

Yes, the problem is decidedly more like Alice's, and that is the reason why we asked a dietitian to suggest a good dinner that could be served for approximately a dollar and a half. Here's what she suggested, together with the approximate cost of the various dishes. Of course they wouldn't cost exactly the same in every city and town in the country, but they'd come pretty close.

Tomato Soup 14¢  
Cold Cuts 50¢  
Potato Salad 29¢  
Buttered Summer Squash 12¢  
Crisped Wheat Bread and Butter 12¢  
Cherry Tapioca 25¢  
Iced Tea with Lemon 8¢

And that adds up exactly to a dollar and a half whether you do it in your head or write it carefully down on a slate.

Here Are the Recipes

Of course you already know how to make most of these things, but here's the way to extend a can of tomato soup so that it will serve six people, and the recipe for the dessert.

Tomato Soup: Combine one can tomato soup, two cups water, half a chicken bouillon cube, salt and pepper, and bring to boiling. Add a pinch of soda. Pour this very slowly into one-fourth cup scalded cream, and serve at once.

Cherry Tapioca: For this recipe you use half of the fruit and all the syrup from a No. 2 can red platted cherries. The remaining cherries can be used in a salad the next day.

Add one cup water to one cup cherry syrup, bring to boiling, add four tablespoons minute tapioca, place in double boiler and cook fifteen minutes, stirring often. Add two tablespoons sugar and a few grains salt and pour the mixture slowly into two beaten eggs. Return to double boiler and cook one minute longer. Add half the cherries from the can, turn into glass dishes and chill. Serve with top milk or thin cream.

as on dresses, colored bows are flattering, eyelets popular and the wide use of white accents on frocks is repeated on navy, brown and black shoes. Even the frock with one-sided trimming effect finds matching footwear with decorations concentrated at one side. This new tendency to create shoes to harmonize with dresses is a vast help in assembling an effective wardrobe.

FLASHES FROM PARIS

Tailored lace gowns are smart. Evening gowns with scarf head-dress bespeak a new trend.

Damson is a color prospect for fall.

Reversible satin capes offer fine color possibilities.

Mousseline de sole, chiffon and other sheers are lavishly tucked or shirred.

Flowers in buns, in tiny muffs and in various novel expressions adorn the formal mode.

Theories About Cain's Wife

There are various theories about Cain's wife. Some students of the Bible claim Adam and Eve were not the first persons on earth but only the first named persons. Others regard the story of Cain as a composite of several traditions relating to different men named Cain who lived at different periods. Others suppose Cain's wife to have been a sister or perhaps a more distant relative. Genesis, chapter 4, verse 14, tends to support the first of these theories—Detroit News.

The Busy Queen Bee

The queen bee deposits the equivalent of her weight in eggs daily. Three days after these eggs, tiny as little pin points, are laid, the blind, footless larvae emerge. During the following six days, a total of but 144 hours, these larvae increase 1,200 times in body weight.

Lafayette Loved Dogs

The great Lafayette, one of the most famous magicians of the last century, so loved his dog Beauty that a portrait of the dog adorned all his checks and theater contracts. A picture of the dog hung outside his London home with the inscription, "The more I see of men, the more I love my dog."

## INTRIGUING IDEAS FOR STREET WEAR

Coats in Dazzling Colors Go With White Frocks.

Some grand ideas in street and daytime clothes, all white or combined with contrasting color, are the latest note in summer wear. White classics in smooth streamlines, with the short sleeved or sleeveless dresses expertly cut, tailored and fashioned with sharply inverted plaits in the skirtline. These are made of smooth semi-rough or stunning new rough weaves of the fashion hour.

Vivid colors are used for the dashingly short coats that top these models, a coral orange, a pencil blue, and Kelly green being the most spectacular. Some have dresses with the tops of navy blue embroidered with anchors, chevrons, and other nautical devices with the separate jacket of white; others have dotted neck bows, or yokes with the same dotted accents on the coat, or the same trick contrived with plaid or checks in chiffon, taffeta, or silk linen.

The smartest of all white suits are of new weaves in heavy silk, and the new smoothies in silk linen and shantung silk and the old time favorite of smooth silk crepe. It's the color combinations that make them the outstanding summer success. And the separate jackets can easily be worn with other dresses of silk or cotton; some of them even go out nights as a slick top for filmy laces or crisp organzas of contrasting color.

Etching Gives Virgin Isle Name

An almost perfect etching of the Madonna with the Christ Child in her arms on one of the cliffs of an island off the southern coast of Nova Scotia has caused the place to be called "Virgin's Island." No human being has ever set foot on its rock-bound shores. Frequent lapping of waves against the steep cliff, storms and frost have created the Madonna etching.

Two Sabbaths a Week

The Abyssinians are the only Christians in the world who observe two Sabbaths each week—Saturday as well as Sunday—and who have made a saint of Pontius Pilate, the Roman procurator who ordered the crucifixion of Christ, written Q. L. Barrows, Providence, R. I., in Collier's Weekly.

Stockings Worn in World War

The woolen stockings worn by soldiers in the World war were manufactured from worsted merino composed of 50 per cent wool and 50 per cent cotton on the "French system" of worsted yarn spinning.

## The "Maccabees"

The "Maccabees" were a family of Jewish leaders of Bible times.

ZENZAL STOPS ITCHY RASH IN THREE MINUTES

Don't suffer the torture and torment of a burning and itching skin any longer. Just step into Reover's drug store and say ZENZAL. Take it home and apply as directed. Then watch the clock. If ZENZAL doesn't stop that itching and burning in three minutes, bring the tube or jar back and get your money.

## TELLS HOW BANKS AIDED PROGRESS

Economist Describes the Ways Banking Institutions Have Contributed to Development of United States

OMAHA, Neb.—Privately owned banking, despite its faults, has served America well, William A. Irwin, Professor of Economics, Washburn College, Topeka, Kansas, declared in a recent address here on "Banking in a Changing World."

"Under the leadership of individuals banking has helped to bring this country to a foremost place in economic development among the nations of the world," he said. "The small community has been developed by the individual bank. The frontiers of America have been pushed forward by the help and counsel of the individual banker. The shocks of wars and depressions in a century and a half have been withstood with the assistance of the individual banker."

### Change May Be Necessary

"It may be that we have reached a tide in the affairs of America when new methods are needed. It may be that we have come to a point where the individual should be submerged for the greatest good of the greatest number." "It may even be that complete centralization of the banking system has become an economic necessity in our complicated social life. But the banker ought to be satisfied that these things are so before he should give up his fight for the system we have known. We came to greatness under that kind of banking; we should not give it up without unmistakable proof of the absolute necessity of such a change."

### The American Pattern

Professor Irwin said that the proposal which has been advanced for coordinating banking operations in the national interest under a "Supreme Court" for banking is typically American and ought to have the most serious consideration of those elements which are clamoring for political control, which is typically un-American. "It is not wise, he said, to oppose changes as such, but that bankers should see to it that change, if and when it does come, shall preserve all that is good in the past and stick as closely as possible to the American pattern of things."

Banking is properly a conservative profession, he pointed out, and should cling to practices and principles of banking that are, and always have been, fundamentally sound. "It is to its credit that so large a group of its members never faltered, even in boom times, in their allegiance to those sound principles," he declared. "We probably owe our salvation from chaos to that fact."

## BANKS AND COLLEGE LAUNCH NEW SCHOOL

Aims to Offer Studies in Advanced Banking Subjects to Bank Executives—Public Duties of Banks Stressed

NEW BRUNSWICK, N. J. — The Graduate School of Banking, an unprecedented educational project, operated under the joint auspices of the American Institute of Banking Section of the American Bankers Association and Rutgers University, with 220 enrolled students from 35 states and the District of Columbia, inaugurated here in June its first resident session.

The states represented and the number of registrants from each were as follows: Alabama, 2; Arkansas, 2; California, 2; Connecticut, 9; Delaware, 8; District of Columbia, 6; Florida, 2; Georgia, 3; Idaho, 1; Illinois, 8; Indiana, 2; Iowa, 1; Kansas, 1; Kentucky, 2; Louisiana, 3; Maryland, 1; Massachusetts, 9; Michigan, 5; Minnesota, 1; Missouri, 5; Nebraska, 1; New Jersey, 31; New York, 50; North Carolina, 8; North Dakota, 1; Ohio, 7; Oklahoma, 1; Oregon, 2; Pennsylvania, 32; Rhode Island, 1; Texas, 5; Virginia, 6; Washington, 1; West Virginia, 1; Wisconsin, 4; Wyoming, 1.

The annual resident sessions of the graduate school will be supplemented, between periods by continued extension work for the students at their homes. The purpose of the school is described as being to offer in a three year course a comprehensive approach to an advanced study of the various administrative problems in banking and trust institutions. The teaching procedure is a combination of the case system and the lecture discussion method.

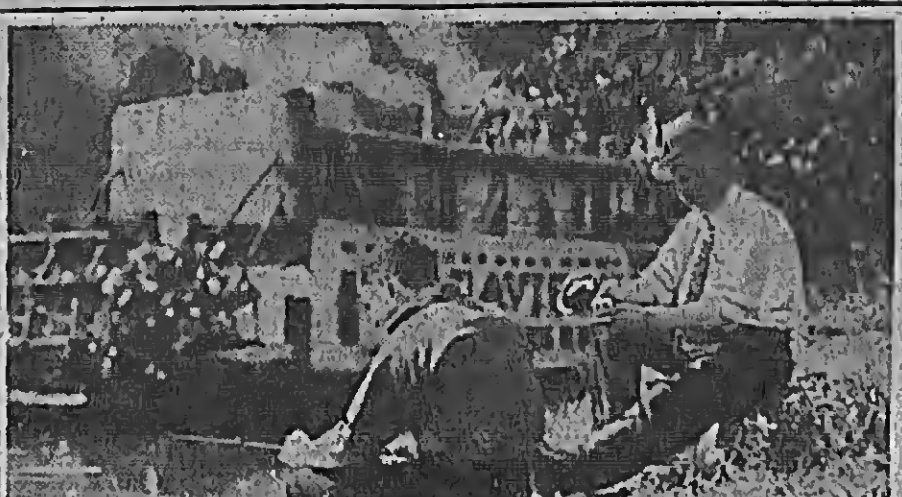

### The Curriculum

The curriculum embraces banking administrative problems and policies, bank investment problems, legal and managerial aspects of trust business.

## THE NEWS SNAPSHOTS

A MERMAID?—No, only Mary Ellen Brown, Movie Star, in a new striped rubber bathing suit.

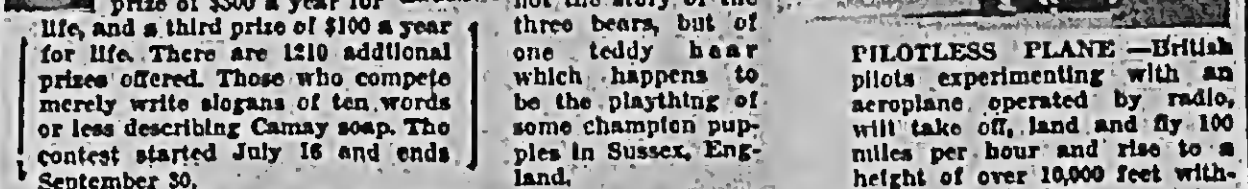

ON THE BANKS OF THE MONONGAHELA—Harry E. Wilken, Sr. and Junior take time out and let other members of the Wilken family take care of business. This man has produced more whiskey than any other living person and together with his two sons, son-in-law and daughter operate a large distillery in the Keystone State.

A THOUSAND DOLLARS A YEAR FOR LIFE—That's what is being offered in the Camay slogan contest. There will be a second prize of \$500 a year for life, and a third prize of \$100 a year for life. There are 120 additional prizes offered. Those who compete merely write slogans of ten words or less describing Camay soap. The contest started July 16 and ends September 30.

BRUNO VAN-QUISHED—This is not the story of the three bears, but of one teddy bear which happens to be the plaything of some champion puppies in Sussex, England.

PILOTLESS PLANE—British pilots experimenting with an aeroplane operated by radio, will take off, land and fly 100 miles per hour and rise to a height of over 10,000 feet without a soul on board.

BICYCLES BATTLE BLAZES—Here you see the fire department of Campbell, Calif., with all the latest machinery to go with their bicycles. This is the first town in the United States to adopt this method of equipment in favor of wheels.

legal phases of bank administration and economic problems in the field of money and credit. The public relations and responsibilities of banks and methods for meeting these obligations are emphasized in the courses.

It is planned to set up similar schools in cooperation with other universities in various parts of the country. The school will add 200 registrants each year for two years until 600 are enrolled.

The trustees of the Educational Foundation of the American Bankers Association have set aside funds from the foundation to grant 100 loan scholarships of \$150 each to qualified applicants for attendance at the school.

### Ships' Papers

Ships' papers are documents required to be carried by a merchant ship such as: Register, charter party if chartered, log book, bills of lading, invoices, manifest, clearance papers, muster roll, shipping articles, bill of health, bill of sale (if ship has been sold by citizens of one country to citizens of another) together with consular certificate, certificate of inspection, officers' licenses, passenger list, if any are carried; license to carry on a particular trade.

### The Percheron Breed

Some historians believe modern Percherons are mixed with Arabian blood introduced into La Perche by captive Arabian horses brought from the Holy Land during the crusades. Others say this had little if any influence on the Percheron breed, but admit that Arabian stallions were likely brought to France by homecoming crusaders.

### Waterfalls Flow Uphill

Probably the only place in the United States where waterfalls flow uphill is the Nuuanu valley back of Honolulu, territory of Hawaii. The strong northeast trade winds, entering the valley in the vicinity of Nuuanu Pali, blow the water upward and dissipate it into spray.

### Most Noble Order of Garter

The ribbon of the Most Noble Order of the Garter is blue, and as this is the highest and most coveted honor in the gift of the British Crown, it became the practice to give blue ribbons as first prizes.

### Uninhabited Islands

There are a number of uninhabited islands to the South Pacific ocean. Tristan da Cunha in the South Atlantic is one of a group of three small islands, two of which are uninhabited. This group is believed to be the most isolated uninhabited group on earth. The two uninhabited islands are named Nightingale and Inaccessible. The Gocos or Keeling in the Indian ocean includes 20 islands, some of which have no inhabitants.

### Guam Not in Philippines

Guam isn't in the Philippines, but some 1,500 miles east of them, in the Mariana Islands. It belongs to the United States, having been ceded by Spain at the conclusion of the Spanish-American war. It has an area of only 206 square miles.

### Fractional Currency

Fractional currency was found generally unsatisfactory. The circulation was maintained only at great expense to the government. It was replaced by coin at the earliest possible moment. The first issue of fractional money was made on August 1, 1892; the last and fifth issue was made from February 20, 1914, to February 15, 1916.

### Colors for Walls

Colors for painted walls are classed by psychologists as "advancing and receding, warm and cool, depressing and cheerful." Yellow, red and orange, for example, are said to be "advancing" colors, and serve to make a room seem smaller. Blue, green, and gray are cool and receding and are therefore suited to small, sunny rooms.

**Forest Management in Canada**  
Under intensive methods of silviculture the forests of France produce, on the average, 41 cubic feet of timber per acre each year; in Germany the average is 50 cubic feet per acre. While such intensive methods are inapplicable in Canada at present, it is estimated by the forest service department of the interior, that, if the accessible and productive forest area in Canada were managed so as to produce even 10 cubic feet of wood per acre, it would practically replace the present annual depletion through cutting, fire, and disease.—Montreal Herald.

### White Clothes Cooler

In bright sunshine white clothes are cooler than dark ones of the same material, because of the greater reflection of light by the white material. In tropical countries garments of closely woven white fabric are worn to protect the body from the hot sun; they have high reflecting powers and prevent the transmission of ultra-violet rays to the skin.

### Berengaria's Church

The little church wherein Berengaria was married to King Richard at Limasol in the island of Crete, nearly eight centuries ago, still stands and continues in use.

### Coal Last 550 Years

The British Isles have sufficient coal resources for at least 550 years, according to a recent survey.

**Reredos in Architecture**  
A reredos in church architecture is usually the screen back of the altar, which is adorned with sculptured work comprising the tabernacle, niches, statuary and the like. In some great cathedrals in England, such as Durham, Winchester and Saint Albans, the reredos is a mass of elaborate carving which reaches nearly to the grating.

### Green Scum Disastrous

Green scum on the surface of lakes takes so much oxygen from the water that occasionally the fish will suffocate.

## Ums, Jellie and Marmalades to Put Up for Winter Use

Let's not let the season of these good foods pass without putting some of them aside for the long winter months.

**Rhubarb Conserve**  
2 pounds rhubarb  
2 1/2 pounds sugar  
1/2 pound seedless raisins  
1 1/4 cups English walnut meats (broken)  
1 orange  
1/2 lemon  
Wash rhubarb and cut in one-inch pieces. Place in preserving kettle, sprinkle with sugar, add raisins and grated rind and juice of orange and lemon. Mix, cover and let stand one-half hour. Place on range, bring to boiling point and let simmer 45 minutes. Stir in broken nut meats. Fill jellies glasses to within one-half inch of the top. Cool and cover with paraffin. Makes 5 6-ounce glasses.

**Strawberry and Rhubarb Jam**  
3 cups strawberries  
2 cups unpeeled rhubarb  
3 ounces powdered pectin  
5 cups sugar

Put strawberries, which have been rinsed and hulled, into preserving kettle. Add rhubarb cut in small pieces. Bring to a boil over a low flame. Stir in pectin and when dissolved add sugar. Cook two minutes or until jam falls off the spoon in sheets. Pour into scalded jars and cover with paraffin. Makes 6 6-ounce glasses.

**Strawberry Jelly**  
4 cups strawberry juice  
3 ounces powdered pectin  
4 cups sugar

Place strawberry juice in preserving kettle and when it comes to a boil, add pectin. Stir until dissolved. Add sugar and boil rapidly 2 minutes. Remove from fire and skim. Pour into scalded jelly glasses and seal with paraffin. Yield—10 4-ounce glasses.

**Raspberry Jam**  
3 quarts raspberries  
1 quart currants  
Equal parts of sugar.

Boil ten minutes after first hard boil.

**Preserved Pineapple**  
Pare neatly selected, large, ripe pineapples. Cut in strips and with a pointed knife remove the eyes and the core.

Cut fruit into small squares and weigh. For each pound of pineapple use 1/2 pound of sugar and 1/4 cup of water. Boil sugar and water in preserving kettle for 3 minutes. Skim any scum which may form.

Add pineapple, cover, and cook for 45 minutes.

Pour into pint jars, cover and turn upside down to cool.

**Minted Orange and Lemon Conserve**  
2 cups orange peel, ground  
1/2 cup lemon peel, ground  
2 cups water  
2 cups orange and lemon juice  
1 cup fresh mint leaves  
Green vegetable coloring  
4 cups sugar

Peel oranges and lemon and remove most of the white membrane. Grind peel and put on to cook with water. Cook until tender and all of the water has been absorbed. In another kettle crush the mint with a potato masher and cover with juice. Heat to extract flavor. Strain and add to cooking. Add coloring to desired shade of green. Bring to a boil and stir in pectin. When dissolved add sugar and cook until liquid gives jelly test. Remove from fire and pour into hot, scalded glasses. Cover with paraffin. Yield—20 ounces.

**Peach Butter**  
Peel and halve one bushel peaches. Press juice from 1/2 the peaches. Add 5 lbs. sugar to the halved peaches. Add the peach juice and 12 split peach kernels tied to a piece of clean cloth.

Cook, stirring to prevent scorching until thick.

Remove the bag of peach stones.

Four into hot sterile jars.

When cold, cover with melted paraffin.

**Plum Butter**

4 cups plum pulp

1 cup plum juice

4 cups granulated sugar

2 tablespoons lemon juice

Wash and cook plums until soft.

Drain in a jelly bag, using most of the juice for jelly.

Press the pulp through a coarse sieve.

Add sugar and plum juice and cook until thick. Ten minutes before it is done, add the lemon juice.

Four into sterilized jars and seal while hot.

**Currant Jam**

Wash currants. Remove from stems.

Weigh and add 1/2 lb. sugar to every pound of fruit.

Boil over a low flame—stirring gently to prevent scorching—until mixture is thick and heavy, or until a spoonful poured on a saucer won't run. If a thermometer is used cook to 222 degrees F.

**Just a Habit**

"Eloquence can't allow be depended on for lasting effects," said Uncle Eben.

"You can't keep folks from backsliding after a political campaign any more than you can after a camp meeting."

**Air-Mail Pilot's Mileage**

An air-mail pilot, judging from official records, is safe for 2,000,000 miles of traveling.

## BEANS

## A National Institution

WE always think of beans, especially baked beans, as a vegetable which reaches its apotheosis in New England and which would probably speak, if it had a voice, with a Yankee twang. As a matter of fact, it is a good, hearty, nourishing vegetable not only full of protein, starch and iron but with bean enough to answer your wants in several tongues. These include the Latin languages spoken in Mexico, Italy and Spain. There are not many better bean dishes, for instance, than these:

### Lima Beans

Italiane

Dice four slices of bacon, and fry them to extract fat. Add one chopped onion, one green pepper, cut in rings, and two cups diced celery, and sauté all gently until brown. Add the liquid from a No. 2 can lima beans, and simmer until celery and green pepper are tender. Then add two cups canned tomato pulp and the beans, and heat well. Pour in center of platter and surround with boiled spaghetti. (You will use about a quarter of a package.) Serve as a main dish with quince jelly. Serves eight.

### Spanish

Lima Beans

Dice two long slices bacon, chop one small onion and fry together. Add one diced canned plum tomato and the drained lima beans from a No. 2 can. Season to taste with salt and pepper and pour into a buttered baking dish. Add enough bean liquor to moisten (about half a cup), and place in a hot oven until brown on top. Serves six.

### Mexican Baked Beans

Fry sixteen rashers of bacon, and remove to platter to keep hot. Pour off all but about six tablespoons of the fat. Add two diced onions and sauté them till golden brown. Add the contents of two No. 2 cans baked beans and two teaspoons chili powder. Heat thoroughly. Add salt to taste, if desired. Serve the bacon on top. Serves eight.

Or, if you prefer to eat your beans in Italian fashion, with a little spaghetti, try these:

## Hints for Motorists

By C. R. Strouse  
Director, School of Automobiles,  
International Correspondence  
Schools

THE following method usually works when a wheel you want to remove sticks so badly that the ordinary wheel-pulling method fails. Jack up the corresponding wheel on the opposite side of the car. Unscrew the hub nut of the wheel you want to remove so as to bring the nut flush with the threaded end of the axle. Then strike the axle end a number of sharp blows with a heavy hammer. The combined pressure and jarring will almost always do the trick.

To straighten out dents in the body that can't easily be gotten at from inside, remove the enamel from the damaged area, sandpaper and apply a light coating of solder. Bend a strong wire at right angles and solder one side of the angle to the center of the dent. Form the free end of the wire into a hook and insert a bar to act as a handle or lever. Pulling on this or using it as a lever will usually pull out the dent. Touch up with enamel after removing solder with a blowtorch.

## Flowers as Traps

There are flowers that close immediately bees and other insects lodge inside them, and in the tropics there are larger specimens which ensnare small birds and mice. Scientists say that they extract the blood from small animals and birds and eject the carcasses. One, a Japanese flower, lures mice into its mouth and drowns them in fluid. Another kills dogs and even goats with its poisonous fumes.—Tit-Bits Magazine.

## Bahamas' Wild Animals

On the Islands of Great Abaco, the Exuma Cays and Inagua of the Bahamas there are considerable herds of wild pigs, wild asses and wild cattle, the escaped progeny of domestic species which have been wild for several generations.

## Ruins of Ancient Days

Ruins of ancient temples on the island of Hawaii stand almost side by side with modern American hotels.

## OLD TIME WHALERS GIVE WAY TO STEAM

### Modern Methods Easier, but Risk Still Remains.

Seattle, Wash.—The old whaling vessels, huge and cumbersome, carrying a nest of small boats to search out and kill the whales, as well as all necessary implements for "trying out" the blubber, have all but disappeared from the famous whaling grounds in the Bering sea. Still common in antarctic waters, they are seldom seen in waters about the Aleutian Islands. In their place have come small, snub-nosed "steam whalers."

Fourteen of these modern ships are renning the cold Bering sea. With a 200-ton gross displacement, each carries a Sven Foy gun mounted on a high and flaring bow. No more do men row away from the motor ship in search of whales; with the modern gun and high speed, each vessel seeks out its own whales and shoots the harpoon from the bow gun.

The gun throws the harpoon, four feet in length and weighing a hundred pounds, from 30 to 40 yards. Behind the harpoon is a cap, containing a charge of explosives fitted to go off three seconds after the harpoon has struck. The whales do not often run with these appliances; the "strike" is usually fatal.

### Processed on Shore.

One of the great dangers of the older methods of whaling was that of fire. The blubber was "fried out," or cooked down, in great kettles carried aboard the ship. The crews turned from hunters to butchers and "cooks," and the whale was reduced to oil and whicbone aboard the ship, to the accompaniment of an unhealthy odor and the constant danger that one of the cooking fires might get out of control and destroy the vessel.

Under modern methods factories for processing the whales are established on shore near the whaling areas. When a whale is killed it is inflated with air and marked with a flag. After the day's catch is completed the dead are gathered up and towed to shore, where the factory carries on the oil-producing processes with a much greater efficiency than was possible under the old methods.

### It's Still Dangerous.

Not all the danger and the excitement has gone, though, from the actual killing of the whale. So testified Capt. Eder Oness of Kodiak, master and gun man of one of the Bering sea whalers, when he said:

"It's just as dangerous as it used to be. Nobody has an easy time standing on the deck beside the gun, in a heavy sea—and the gales are bad off the Aleutian Islands. The whale slips up for as long as you can say 'scat' and you are supposed to shoot him now. That is hard to do."

But the Bering sea whalers were jubilant as they started out this year. Prices on whale oil were double what they were last year and the prospects for a large catch were good. Best quality oil is used for soap making, while sperm oil, which comes from the head cavities of certain types of whale, is used in perfumes and medicines.

Only one company, that of William Schupp, known as the "whale king of the Pacific," operates in the Pacific whaling industry. The company operates seven boats from Seattle and seven from Canadian ports. Last year they got 814 whales.

## Wales Proves to Youth He's Really a Prince

Vienna.—The prince of Wales sent a magnificent toy railway and a personal card to little George Schmid, living in the Vienna Karl Marx Hof, and proved himself a prince.

When the prince of Wales was in Vienna he visited a number of workmen's apartment-houses, among them the Karl Marx Hof, the headquarters of the Socialist Schutzbund during the revolution of February, 1934. On his rounds he came to the kindergarten, in which little George, son of an unemployed man, was playing with other children.

"Get up and shake your bow to the prince," the boy was told.

Little George, however, replied with the self-assurance of his five years. "This isn't a prince, for he hasn't a crown."

The heir to the British throne didn't forget the only person who doubted his identity in Vienna.

Little George believes now in the gentleness of the waiter.

## Liberty Statue to Have Birthday Party in 1936

Washington.—American citizens have been invited by the national park service to participate next year in a program which will mark the fiftieth anniversary of the Statue of Liberty.

The monument was unveiled on October 28, 1886. The nation shared in the ceremonies.

The park service has requested that everyone interested in the semi-centennial celebration assist in locating and assembling poems and pictures of the statue which were published at the time France presented the memorial.

It was pointed out that many of those pictures and illustrated accounts were "striking and artistic, lending themselves admirably to effective reproduction."

Authors who wrote poems during the dedicatory period included: John Greenleaf Whittier, Ella Wheeler Wilcox, E. O. Steadman, Charles Barnard, Esther Singleton, John J. Garbutt, Sidney Herbert Pierson.

## HOUSEHOLD HELPS.

If you have boiled and raw eggs in the ice box and can't tell them apart, as they often get mixed when there are several in the family, using the ice box, spin them on the table like a top. Boiled eggs will spin and raw eggs will not.

Paper clips are fine things to keep bins tape, elastic and ribbon from getting tangled up in the work box or machine drawer. They do not leave rust places like pins.

When waxing floors, if you will also wax the rockers and feet of your chairs they will not mar the floor when moved about.

An easy way in which to mend a tablecloth is to place a piece of white paper over the hole, having it a little larger. Sew on machine around the edge of the paper, then back and forth across it, or in a circle as you would darn with a needle. The paper is removed by soaking, leaving a neat square or circle firmly mended.

When making a belt that must first be sewed up on the wrong side, put a heavy string, longer than the belt, on the right side and sew the string onto one end of the belt. When the belt is sewed up, pull the string through. This saves much time.

When making new pillows, the ticking may be made more feather-proof by treading on the wrong side with a hot iron which has been rubbed with beeswax. This makes a varnish-like coating and the feathers cannot work through.

## Snow and Flowers

In a country which shows such a great variety of geological formations as Switzerland, the seasons cannot be clearly delineated or their time fixed as elsewhere. Here winter and spring always overlap each other, so that ski-fields and gardens in full bloom are neighbors, and startling contrasts are achieved by nature.

# HICKORY

The Thompson family, including Mr. and Mrs. George Thompson and sons, Harold and George; Mr. and Mrs. Will Thompson and Helen, Mr. and Mrs. Philip Gould and family of Grayslake and Dr. and Mrs. P. M. Jorgenson of Kenosha attended a picnic given by the George Teppo family at their cottage at Diamond Lake Sunday. About fifty guests were present.

Mr. and Mrs. Harold Brazie and children of Long Lake called at the Harrie Tillotson and Emmet King homes Saturday evening.

J. P. Halre of River Forest called at H. A. Tillotson's Monday of this week enroute to Milwaukee.

Mr. and Mrs. Louis Melling and children of Chicago visited from Wednesday until Saturday at the Hugo Gussarson home.

William Gonski and son, Victor and daughter, Gertrude from Waukegan called at Wilbur Hunter's Sunday afternoon.

Mr. and Mrs. B. Oskins and daughter, Dorothy, from Russell spent Sunday with the John Crawford family.

Mr. Kamela of Chicago visited Sunday at Clarence Spierling's. His small daughter, Gloria, remained out for the week.

Mrs. Mattie Edwards and grandson, Edward Dickey from Forest Park spent Tuesday of last week with Mrs. Harrie Tillotson.

Mr. and Mrs. Nola Gussarson from Chicago visited from Friday until Sunday at Hugo Gussarson's.

Mr. and Mrs. E. W. King and Wilson and Grace, also Mrs. Ellen Tillotson visited the Harold Brazie family at their cottage at Long Lake Sunday afternoon.

Mr. and Mrs. Roy Heydecker of Waukegan called at the John Crawford home Tuesday of this week.

Miss Helen Thompson spent a few days of this week with her cousin, Eleanor Gould of Grayslake.

Mr. and Mrs. George Harmer and children of Waukegan spent Sunday evening at the Will Thompson home.

Mr. and Mrs. Frank Kennedy entertained their cousin, Mrs. McRoberts, from Iowa City, Iowa, from Friday until Sunday.

Miss Caryl Tillotson with Miss Ruth Ames of Gurnee attended the show, "Les Miserables" at the Genevieve Theatre in Waukegan Saturday evening.

## American Place Names

By their fruits ye shall know them: Berry, Ala., Ark., Ky.; Grape, Ky.; Orange, N. J.; Pine Apple, Ala.; Tangerine, Fla.; Peach, Wash.; Pear, W. Va.; Persimmon, Ky.

## Unique National Park

America's most remote national park is that in her mid-Pacific territory of Hawaii. The park is located on two islands, Hawaii and Maui, separated by some fifty miles of sea.

## Animals of Late Stone Age

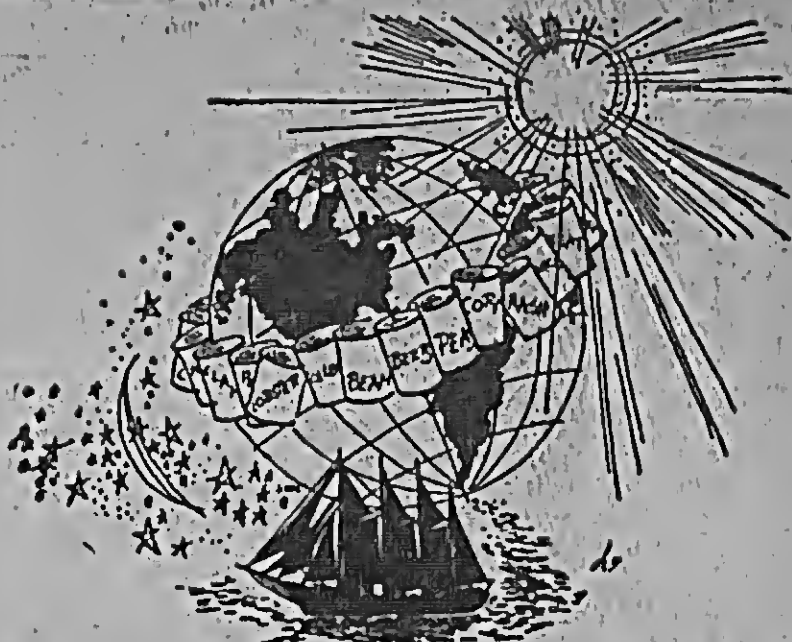

Men of the late Stone age in Europe had for domestic animals the ox, pig, sheep, goat, and dog, and possibly the horse.

## Believe in Evil Spirits

The Japanese are neither religious nor very superstitious, yet they still believe in evil spirits and resort to exorcising ceremonies.

## Oldest Ball Field on Coast

Oak Park in Stockton, built in the 1870s, is believed to be the oldest baseball field on the Pacific coast.

# Canned Foods Met All Tests

## Proved Lifesavers on Voyage Around the World

HOW the crew of the "Seth Parker" fared on an exclusive diet of canned foods for more than seven weeks, and ate them all around the world to Samoa, Constantinople, the ship's navigating officer, The "Seth Parker" is the famous four-master which sailed last year under the command of Phillips Lord who created the radio character after which it was named.

The ship's voyage took it through the furnace heat of the equator and the freezing cold of the North Atlantic in mid-winter, but the canned foods it carried stood up through all changes of temperature and proved lifesavers throughout the trip.

## Seven Weeks Without Fresh Food

"We expected," said Flink, who has been on sailing ships for over thirty years, "to sail the seven hundred miles from Panama to the Galapagos Islands in a boat a week, but like the Ancient Mariner, we were becalmed in the doldrums, and it was well into the ninth week before we reached the islands. After the first two weeks out of Panama all of our fresh food was exhausted, and we had to rely exclusively on our canned supplies.

"Fortunately we had brought along some canned loganberry juice and canned tomato juice. There was never a sign among our crew of that dread scourge of the seas, scurvy, which was so prevalent in the old days of

sailing vessels that British ships were called 'limo jacks' because they were required by law to serve limo juice to the crew to ward off this disease.

"But even if we had not had the loganberry and tomato juice, we would not have feared scurvy, as we had a plentiful supply of canned spinach, beans, carrots, peas and other vegetables which are equally good preventatives. We also had such meats as canned corned beef and frankfurters, and such fish as canned clam chowder and codfish cakes. These latter foods were luxuries because you can't catch fish at sea, you know, except once in a long while a stray dolphin.

## And Then Mostly Canned Foods

"At the Galapagos Islands we caught a big haul—two tons of fresh fish, but we couldn't get much there in the way of green vegetables or fresh fruit. We got a large supply of wild lemons, but that was all in the way of fruit, and for fresh meat we killed two wild bulls.

"It really wasn't until we reached the Marquesas about a month later that we could get a plentiful supply of fresh foods, so for nearly three months the chief part of our diet consisted of canned foods. And we all kept healthy and liked it. We had some things which are not usually canned put up in tins to preserve them at sea through all the varying temperatures. Shredded wheat, for instance. And we had powdered milk and malted milk as well as evaporated milk.

"As a matter of fact, we subsisted largely on canned foods during the entire voyage."

# HOSE ARE ADAPTED TO CUT-OUT SANDALS

Sandal shoppers have been buying all the newest models in these most revealing trifles masquerading as summer footwear have possibly been more than a little troubled by the problem of proper stockings to wear with these high fashion slippers. But the hosiery designers have kept in step, and the last arrivals ready for sandal collectors are the semi-sandal hose.

As you may surmise, the extra thickness is distributed over the area where it will do the most good, but so cleverly restrained that even the most cut-out of sandals show only the sheerest part of the hose. Heel reinforcements, as well as the toe sections and the long, very narrow panel under the foot, make them ideal numbers. Very sheer and not so sheer stockings in all the newest of summer tints, tones, and shades, with a flock of fancy new names, are now ready.

## Langvin-Designed Draperies

### Fall in Swirled Festoons

Langvin, this season, designs draperies which fall in portiere-like drapes of swirled festoons. From three great gold rings at the front decollete of the evening gown she swings drapery of rich black silk crepe falling to the floor.

She makes a smoke gray crepe afternoon frock with a skirt whose cris-crossed folds swoop from the waist to the hem and back again, and fashions a long-sleeved green crepe evening gown with skirt panels worked in green and gold paillettes like an old mosaic.

## Bags Like Cameras

The new bags of polished calf look like camera cases, for they are often deeper than they are wide. They come in rectangular pouches slung from a strap on the wrist and are a distinct departure from the flat "envelope" so long in vogue.

## Olefin Trees

A tree, which smells exactly like green onions grows in Central America. The marines discovered it during their late occupation of Nicaragua. A low-flying plane skimmed the top of a tree and brought a torn branch back to Managua. Pulled from the wing fabric the twig gave off the powerful scent of green onions.—Washington Post.

## The Ebionites

Ebionites is a general name given to Jewish Christians who remained outside of the Catholic church from the apostolic age down to the time of Jerome.

# NATURAL TONES ARE FAVORED JUST NOW

## Strong Colors Appear in All Summer Fabrics.

Natural tones are outstanding. They appear in every type of washable sports silks, linens and cottons. They are followed closely by the strong peasant tones, such as gold, vivid pinks, clear strong greens and blues.

"Sweetpea" colors, combining strong and light tones such as mauve and wine-red, two tones of lilac, deep and light pinks, are taking hold quickly. The prevalence of two-tone treatments makes it easier to assemble a smart accessory ensemble without having to match the dress, giving that appearance of studied casualness of which our English sisters are past masters. Some printed silk crepes and end-on effects are used, but in the main the monotonous have it.

Washable silk shirtings are to be found in abundance. In the regulation striped effects and in end-on-end weaves. Using the fabric with the stripes running in two directions is a favorite theme. Silk glinchams also are used, and fall into the same type group. A navy and white dress, striped diagonally, with an off-white jacket, is typical.

## CHAMOIS VOGUE

By CHERIE NICHOLAS

The idea of wearing chamolins hat and jackets and various accessories of chamolins is making a big appeal out in the Hollywood colony where film beauty set the pace in high fashion. Here we see Jean Harlow wearing a perfectly stunning suede jacket. Note how artfully it is padded, thus indicating an interesting fitted line. The pockets are triangular shaped which, together with big ball buttons, lend a heap of chic. The jacket is collarless so that it can be worn with a scarf. Jean is carrying a soft shirred calfskin bag with barrel shape lock. Below in the picture is an ensemble of chamolins hat, gloves and jacket which Gertrude Michael elects to wear with her navy blue dress which has polka dots and a huge ruffy jabot.

## Sports and Evening Wear for the Summer Holiday

To sail away for a summer holiday is a glorious adventure at any score, but to sail away with the right clothes is very near perfection, an easy thing to achieve if one simple rule is followed.

Take only two types of clothes, sports and evening. Sports clothes are the backbone of the proper cruise outfit. Clothes to walk the deck in, to play games in, to lunch in, play bridge in.

Evening clothes added to the sports things complete the cruise wardrobe list. Everyone dresses for dinner on shipboard, so take five or six evening frocks, two wraps, stockings, slippers and bags. Evening dresses are floor-length, often without trains; sometimes high in back and low in front with covered shoulders or puffed sleeves.

## Novel Ornament

A novel ornament for informal wear consists of two gold clips which are fastened on either side of the neckline; the clips are connected with a braided gold chain. The resultant effect is almost that of a necklace.

## STYLE NOTES

Again fancy turns to plaited satin. Chiffon gowns are lavishly plaited.

Quilted taffets coats are smart for summer.

Dotted swivel accessories is fashion's latest whim.

The flair for violet and lilac tones is widespread.

Compose tailleurs (skirt and jacket contrast) lead in the mode.

Knittees and more ruffles animate youthful summer evening frocks.

## Being Proficient, Efficient

Proficient and efficient are almost interchangeable, but not quite. Proficiency denotes skill, as does efficiency. But the latter introduces an element of mental capacity not connoted by the former. To illustrate: Two workmen may be equally proficient, equally facile with their tools. They are given identical jobs. One arranges his tools orderly, so that there will be no lost time in the performance of the job; the other mislays his tools and loses much time in finding them. The first is efficient; the second is not. Similarly, a woman may be a proficient, a capable housekeeper, but not nearly as efficient as she would be with modern mechanical aids.—Literary Digest.

## Shoot From Right Shoulder

Most shotgun fans shoot from the right shoulder, and, in most instances, the right eye is the "master eye." However, observes a writer in the Kansas City Star, in many cases the left eye is the dominating optic and, when this condition exists with a right-handed shooter, difficulty in correct gun pointing is experienced. Such an individual, if shooting with both eyes open, is quite liable to "cross-fire" without knowing it, for although he believes he is pointing with the right eye it is the left eye which is registering the guidance. Such a shooter should close his left eye or learn to shoot from the left shoulder.

## Radium Salts for Healing

Strange to say, it is not the pure elemental radium that is sold and bought. This, a white, glistening solid, visible in the dark, was first prepared only after the greatest difficulty in 1910 by Madame Curie. Fortunately it is not radium metal that is necessary for cancer treatment. In hospitals, it is grayish salt of radium, that looks like dirty table salt, which is used; radium bromide, perhaps, which contains chemically combined about 54 per cent of radium, or it may be radium sulphate. From the radium, speed extremely penetrating rays, more penetrating than X-rays, destroying morbid cancer cells, thyroid tumors and birthmarks.

Confederate Breastworks  
Numerous earthen breastworks used by Confederate soldiers in defending Atlanta, Ga., during the war between the states remain intact in the Grant park section of the city.

Rhinoceros Larger Than Elephants  
Fossil bone discoveries show that in ancient times there was a kind of ancient rhinoceros that stood almost eighteen feet high, far larger than the elephants.
